An increasing number of people today frequently change their careers and places of residence several times during their life. I think that it is a positive development and I will try to explain why I think so.

As I know, it was not easy to change a career or a place of residence and not everyone could do it. But now everybody can choose a job if he or she is quite educated or has additional skills that he or she needs on this job. Also, if you have enough money, you can easily change your city or a country and live in a place you like. I want to add that you can ask your bank for money if you can't afford to change a place of residence.

I have an example that I want to include in my essay. My friend lived in his family's own house in my city, but his family wanted to live in Krym. They sold their house, flew to Krym, bought a floor and now ~~there~~ they're happy because of their new home.

In conclusion I believe that it's good that in our days it's quite easy to choose how to live by yourself. I hope that in the future people will be able to do it with a few amount of money than nowadays.

Writing.

Nowadays the number of people who change their places of residence ^{and careers} several times is increasing. Is this a positive or a negative development? As I believe

~~On the one hand,~~ ^{just} this is ~~really~~ great. The reasons of ~~these~~ ^{these people's} ~~that their~~ ^{is} choices ~~are~~ clear: they're not happy with their job and life in general, so they're trying to change something. You

~~On the other hand,~~ you will never know if your life can ^{be} become better if you're not brave enough to try something new. An increasing number of people who change their place of residence also shows that it's a lot easier to move to another city or country ^{nowadays} in comparison with a century ago, which is, in my opinion, wonderful. I have an example of a person, who changed his career, sphere, and everything went great: +

that person is my dad. ~~On his~~ ^{his} previous place of work didn't satisfy him at all: he was always stressed out and worked too much, and the salary ~~hadn't~~ ^{hasn't} ~~hadn't~~ ^{hadn't} been fixing anything, because it wasn't ~~high~~ really high. Fortunately, ~~he decided to leave this job and has~~ ^{my dad} ~~has~~ found a new job and ~~decided to~~ decided to ~~to~~ leave the old one and, lucky him, ~~this~~ ^{that} was the right ~~choice~~ decision.

In conclusion, I believe that it's wonderful that people can easily change their life for better.

In one hand, an increasing number of people change their career and places of residence several times during their lives, these days is positive, because these people are exploring the world around they and improving their skills in different spheres. This means, that people trying to find, where they are good at best of all. Also, changing the place of work can allow you make new ~~contacts~~ with unknown people.

~~But~~ But not everything is so straight. On the other hand, moving to a new residences too much can not allow you to concentrate on work. Of course, it causes many psychological illnesses.

Of top, I want to tell you my example. As I moved to 10th form, many of my friends leaved our school, and many new comers came in our class. For a few days it was uncomfortable for me and for others to communicate with unknown people. But now, many of us made new friends and became good mates. I asked some of them and got answers, that first their days in our school were nervous. They came here to improve their knowledge. Newcomers could stay in their old schools, but they needed to get better education in our school.

In conclusion, I want to say, that there is nothing bad to change something in your life.

An increasing number of people today frequently change their careers and places of residence several times during their lives. On the one hand, it is very good because people can live wherever they want and do whatever they want during their lives. In our days, I'm sure, it is absolutely normal. It is a positive development, that everybody can just leave his work and go to another town or country. There are a lot of reasons for that. For example, troubles with work, politics of country in that they live and a lot of others.

On the other hand, it is not good at all for some people, because they cannot concentrate on the work or one town or country, so they are just trying to find it. Of course, some people travel ~~at~~ around the world and work anywhere and it is their life style. But others can't find their way and just spend their ~~time~~ life without any achievements.

It's everyone's choice: to stay at one place and concentrate on work they like more or to leave their home and try to find their own way in this world.
